Development
Agency

Legume Generation

- Boost breeding of major food and feed legume crops in Europe
- 6 Innovation Communities: 43 pre-breeding and 32 breeding programmes
- Collaborations between public research and private breeders
- Newly-bred germplasm and cultivars proven on farm

Funded by
the European Union

Legume Generation

Microbiomes4Soy

1 January 2024 -
31 December 2028

Microbiomes4Soy

Funded by
the European Union

Creating microbiome-based solutions for more sustainable food production

- Primary production: prediction model, novel microbiome application
- Improve nutritional value of soybean seeds: effects on human health and the human gut microbiome
- Develop novel aquafeeds: effect on fish performance and fish gut microbiomes
- Food transition pathways

Microbiomes4Soy

Thank you!
